ACKNOWLEDGEMENTS

The Engineering Council acknowledges contributions made to the development of this textbook by:

Bath University - School of Mechanical Engineering
Yeovil College of Further Education - Engineering department
Smestow School, Wolverhampton
Dagenham Priory School, Essex
John Kelly Boys' Technology College, London
Maclaren Ltd., Northampton
Yamazaki Machinery UK Ltd., Worcester
GEC Alsthom
Colin Chapman
Alan Lazell

Pictures

Yamazaki Machinery UK Ltd., Worcester
St Peter's RC School, Guildford

Edited by Alan Lazell

Design and layout by Peter Stensel

Line illustrations by James Wilkinson and Peter Stensel

Series Editor **John Cave**
Middlesex University

CONTENTS

UNIT 1	Designing and Making a Helping Hand	1
UNIT 2	Robotics: Designing and Making a Walking Robot	15
UNIT 3	CAD/CAM: Designing and Modelling an Adjustable Rake Steering Column	39
UNIT 4	Batch Production: Designing and Making a Paper Perforator	51

STUDY FILES

1.	Design for Economic Manufacture and Assembly	63
2.	Concurrent Engineering	75
3.	Quality and Quality Assurance	79
4.	Quality Control: Inspection Techniques	85
5.	CNC Machining	95
6.	Clamping Devices	103
7.	Computer Integrated Manufacture	105
8.	Types of Manufacturing Systems	113
9.	Economics of Materials Processing	119
10.	Controller for Animatronic Toy	121

TEACHER'S NOTES
